SUMMARY

DevOps and platform engineer, 14+ years across Azure, Kubernetes, and CI/CD. Six of those years were client-facing delivery lead roles for Citi Bank and a US health insurer, running distributed teams of up to 20 engineers. Strongest hands-on in Terraform, Ansible, AKS, GitOps, and pipeline security. Built two platforms from scratch in 2026 and published both on GitHub (an Azure Landing Zone and an AKS internal developer platform), and moved Claude Code and MCP into daily automation work.

CORE SKILLS

Platform & GitOps: Kubernetes / AKS, Helm, ArgoCD (GitOps), internal developer platform, golden-path self-service, subscription vending

Cloud & IaC: Azure (Landing Zone, AKS, PostgreSQL Flex, Key Vault, VNet, OIDC, Migration), AWS, GCP, Terraform, Ansible, OpenStack

DevSecOps & Policy: OPA / Gatekeeper (policy-as-code), External Secrets, SonarQube, Checkmarx, JFrog Artifactory / Xray, SAST / SCA

Observability & Delivery Metrics: Master DevOps Dashboard (MTTR, deployment trends), scheduled drift detection, in-pipeline Kubernetes cost signals

CI/CD: Azure DevOps, Jenkins, Harness, Tekton, TeamCity, GitHub Actions, uDeploy, RLM, Copado

Containers: Docker, Kubernetes, Helm, AKS, EKS, GKE

Scripting & SCM: Python, Bash, PowerShell, YAML | Azure Repos, GitHub, Bitbucket, Git

Databases: PostgreSQL, Azure PostgreSQL Flexible Server, SQL Server (OLTP / OLAP), MySQL

AI & Productivity: Claude Code + MCP, GitHub Copilot, Perplexity AI

ITSM & Agile: ServiceNow, JIRA, Confluence, Remedy, HPSM, SAFe, Scrum

EXPERIENCE

Career Break — Independent Platform Engineering & AI-Assisted DevOps Jan 2026 – Jul 2026 | Hyderabad, India
Planned break for family reasons, now resolved. Built two platforms end to end and published both on GitHub.

- Built an Azure Landing Zone in Terraform, packaged as reusable modules: management-group hierarchy, Azure Policy governance, hub-and-spoke networking, and subscription vending.
- Built an internal developer platform on AKS. ArgoCD runs GitOps, OPA Gatekeeper enforces admission policy, and External Secrets pulls from Key Vault over workload identity. A developer commits one YAML file and gets a namespace, pipeline, TLS, and secrets without raising a ticket.
- Use Claude Code and MCP daily, mainly for Terraform module authoring, Helm scaffolding, and first-pass incident analysis.
- Put FinOps into practice: Kubernetes cost signals run inside the pipelines instead of a monthly spreadsheet.
- Portfolio: github.com/RajeshPat87

Senior IT Specialist — DevOps / Platform DSV Global Transport & Logistics Jan 2024 – Dec 2025

Azure, Terraform, Ansible, Azure DevOps, Python, Key Vault, PostgreSQL Flexible Server

- Built reusable Terraform modules and Azure DevOps YAML pipelines to provision PostgreSQL Flexible Server across 5 environments (DEV, QA, TST, PPR, PRD), covering new-instance, update, decommission, restore, and multi-instance flows. Cut new-instance provisioning to [ADD METRIC: e.g. hours instead of days].
- Moved pipelines to OIDC passwordless authentication, which removed stored credentials and enforced least-privilege access across Azure subscriptions and storage accounts.
- Built a Master DevOps Dashboard that pulls MTTR and deployment-trend metrics from Azure DevOps, GitHub, JFrog, and SonarQube into one view for leadership.
- Codified subscription-level network segmentation, private endpoints, and policy-driven resource placement across OLZ and NLZ zones, which standardized how new environments were onboarded.
- Wrote Ansible playbooks for PostgreSQL configuration, admin and user management, and secret retrieval from Passwordstate and Azure Key Vault.
- Orchestrated multi-stage workflows (Plan, Apply, Post-Restore, Post-Deployment) with manual approvals, scheduled drift detection, and conditional destroy or restore logic.

Sr DevOps Consultant & Team Lead Infosys Limited

Jul 2023 – Dec 2023

Client: Citi Bank | Jenkins, RLM, SonarQube, Checkmarx, Bitbucket, TeamCity, uDeploy | 7-region rollout

- Single point of contact for Citi's CI/CD delivery across 7 regions. Led 18-20 engineers as Scrum Master, running sprint planning, task allocation, and daily stand-ups.
- Ran Jenkins and RLM across all 7 regions: setup, configuration, patching, and vulnerability remediation for every build and deployment environment.

Sr DevOps Consultant & Team Lead Infosys Limited

Jan 2021 – Jun 2023

Client: Citi Bank | Jenkins, RLM, uDeploy, TeamCity, Bitbucket, Harness, Tekton, Helm

- Designed and delivered the CI/CD system for Citi's next-generation data-analytics platform across 7 global regions.
- Built Harness CD pipelines with Helm packaging for Kubernetes, and Tekton pipelines for cloud-native CI.
- Owned the full delivery lifecycle for an 18-20 person distributed team: scope and sprint planning, SLA and risk management, escalations, onboarding, and knowledge transfer.

Azure DevOps Implementation Engineer & Team Lead Tata Consultancy Services Jun 2019 – Jan 2021*Client: US Health Insurance Organization | Azure DevOps, MSBI, DataStage, .NET | On-prem & Azure*

- Client-facing delivery lead and single POC for the Azure DevOps implementation, running a 9-12 person onshore and offshore team across time zones.
- Installed, configured, and administered Azure DevOps on-prem: roles and rights, repositories, pipelines, deployments, and release management.
- Built CI/CD for .NET, DataStage, and MSBI across on-prem and Azure, and helped migrate workloads into Azure-hosted environments under enterprise landing-zone standards.

Database Administrator & BI Developer Tata Consultancy Services

Mar 2017 – Jun 2019

SQL Server 2005-2016, SSAS, SSIS, SSRS | 90+ production servers

- Administered 90+ SQL Server production instances (2005-2016): backup, recovery, maintenance planning, and 24x7 production support.
- Implemented high availability with Log Shipping, Database Mirroring, Replication, and Clustering, and set up Azure DevOps on-prem for CI/CD.

Database Administrator Wifin Technologies India Pvt Ltd

May 2012 – Mar 2017

- Managed 40+ SQL Server instances (2000-2016): installation, configuration, backup, recovery, maintenance, and production support. Led upgrades and migrations from SQL Server 2000/2005 to 2008 and 2008 R2.

CERTIFICATIONS

Microsoft Certified DevOps Professional (AZ-400) • AWS Cloud Practitioner • FinOps Certified Practitioner (Linux Foundation) • Copado Certified Salesforce DevOps Administrator / Developer / Professional • Microsoft Certified in SQL Querying & Tuning

AWARDS

Technical Excellence Award (Infosys) • Business Ninja Award (Infosys) • Insta Award (TCS)
